re: Patricia Jackson

7/21/2020

Dear Dr Chen,

Patricia has a very painful and stage 4 arthritic right hip. She needs a total hip replacement but her BMI is 47. We will not do the replacement due to the increased risk until her BMI comes down to 40. She has to lose at least 45 pounds. That will take quite a few months. In the interim she will probably need to have her pain medication increased.

Thank you.
